KLINGER & RAM

MECHANICAL SEALS
SINCE 1960

OUR COMPANY

In 1960, the late Yehuda Klinger introduced mechanical sealing innovation to Israel when he established his workshop for metal lapping and polishing. In 1992, his daughter , Ofra, and her husband Amnon Ram, left the kibbutz, joined the family business, and thus "Klinger at Ram" was established.

Since then, "Klinger at Ram" has continued to lead and advance the field of lapping and mechanical sealing in Israel. We support the local industry, adhering to the strictest industry standards for work processes and quality control. In the past, they we chosen as the exclusive manufacturing workshop in Israel for some of the world's largest sealing manufacturers. With over 60 years of accumulated engineering and production capabilities, we continue to evolve and grow

Abilities

- The company provides **all-in-one mechanical sealing services** for pumps and rotating equipment with manufacturing, refurbishment, and engineering design skills.
- It leads the industry with its **ability to customize parts** according to customer needs through designing and production.
- The company possesses a large number of specialized and customized Lapping machines, combined with a metalworking department equipped with advanced lathes and milling machinery.

Experience and innovation

"Klinger at Ram" leads and pioneers the field of mechanical sealing and Lapping in Israel. It is the first company in the country to engage in mechanical sealing, with a history spanning over 64 years and currently innovating new technologies for mechanical sealing with the support of the 'Israel Innovation Institute'.

Standards

With ISO certification, FDA approvals for its products, and compliance with the Israeli Ministry of Defense standards, the company upholds the highest industry standards. It has been previously selected as a service center in Israel for two of the world's largest mechanical sealing manufacturers from England and Germany
